Purpose
This course is designed to present new developments in the field of cardiovascular disorders, as well as their clinical applications, in order to encourage discussion and promote improved patient outcomes in all our practices.

We have chosen topics and presenters to cover the latest in familiar topics as well as map out areas of frontier exploration.

Objectives
- List the latest treatments in 5 most common vascular problems
- Interpret the indications for action in treating
- Compare new treatments in Cardiovascular disease

Target Audience
This symposium is designed for family practitioners, internists, cardiologists and emergency department physicians who diagnose, treat and manage patients with cardiovascular disorders. It will also be of interest to fellows, residents, MAs, MAs and other allied health professionals interested in cardiovascular disease.

Elements of Competence
This CME activity has been designed to change medical knowledge and patient care, two of the six competencies embraced by the American Board of Medical Specialties.

Accreditation Statement and Designation of Credit Statement
