

Types of CE Activities

- **Course:** A live CE activity where the learner participates in person. A course is planned as an individual event. Examples: annual meeting, conference, seminar.
- **Internet Live Activity:** A live course available via the Internet at a certain time on a certain date and is only available in real-time, just as if it were a course held in an auditorium. Example: Microsoft Teams Event.
- **Internet Enduring Material Activity:** An enduring material provided via the Internet, meaning that there is no specific time designated for participation. Rather, the participant determines when to complete the activity. Examples: online interactive educational module, recorded presentation.
- **Journal-Based CME:** An activity that is planned and presented by an accredited provider and in which the learner reads one or more articles (or adapted formats for special needs) from a peer-reviewed, professional journal.
- **Regularly Scheduled Series (RSS):** A course planned as a series with multiple, ongoing sessions, e.g., offered weekly, monthly, or quarterly; and is primarily planned by and presented to the accredited organization's professional staff. Examples include grand rounds, tumor boards, and morbidity and mortality conferences.
- **Performance Improvement CME (PI CME):** An activity structured as a three-stage process by which a physician or group of physicians learn about specific performance measures, assess their practice using the selected performance measures, implement interventions to improve performance related to these measures over a useful interval of time, and then reassess their practice using the same performance measures.
